Office Action Summary	Examiner	Art Unit				
	Yewebdar T. Tadesse	1734				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
2a) ☐ This action is <b>FINAL</b> . 2b) ☐ This 3) ☐ Since this application is in condition for allowar	☐ This action is FINAL. 2b)☐ This action is non-final.					
Disposition of Claims						
<ul> <li>4)  Claim(s) 12,13,24,25 and 33-38 is/are pending in the application.</li> <li>4a) Of the above claim(s) is/are withdrawn from consideration.</li> <li>5)  Claim(s) is/are allowed.</li> <li>6)  Claim(s) 12-13, 24-25 and 33-38 is/are rejected.</li> <li>7)  Claim(s) is/are objected to.</li> <li>8)  Claim(s) are subject to restriction and/or election requirement.</li> </ul>						
Application Papers						
9) The specification is objected to by the Examiner.  10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.  Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
<ul> <li>12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).</li> <li>a) All b) Some * c) None of:</li> <li>1. Application/Control Number: 10/615,495

Art Unit: 1734

### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 2. Claims 12, 24, 34-36 and 38 are rejected under 35 U.S.C. 102(a) as being anticipated by Schembri et al (US 6,518,056).

As to claims 12 and 24, Schembri et al discloses (see Figs 2 and 2C and column 14, lines 15-34) a liquid jetting apparatus for jetting a liquid to be applied to a substrate, comprising a first droplet jet head, a second droplet jet head and a third droplet jet head each head having at least one nozzle or 1<sup>st</sup> –3<sup>rd</sup> nozzle train (four inkjet pens or heads each head having series of nozzles 27c); a spin coater (a spinner assembly 23) for rotating a substrate; wherein the first the second and the third heads are arranged at first, second and third angular orientations respectively (heads 27b located at a different angle) relative to the radial direction of the substrate (each inkjet pen or head located at the appropriate radius of the respective ring 15).

With respect to 34 and 36, in Schembri et al, each of the first droplet jet head, the second droplet jet head and the third droplet jet head each head (each four inkjet pens or heads 27b) have equal width and equal lengths (see Figs 2 and 2C and column 14, lines 15-34).

Application/Control Number: 10/615,495

Art Unit: 1734

As to claims 35 and 38, in Schembri et al, each of the first droplet jet head, the second droplet jet head and the third droplet jet head each head (each four inkjet pens or heads 27b) have the same number of nozzles (27c).

#### Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. Claims 13, 25, 33 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schembri et al (US 6,518,056) in view of Shimoda (US 5,831,645) JP10-166574.

Schembri lacks teaching the first droplet jet head, the second droplet jet head and the third droplet jet head each head having mutually different widths and different lengths and different number of nozzles. However it is known in the art to arrange a plurality of ink-jet heads with different number of nozzles, widths and lengths in order to

Application/Control Number: 10/615,495 Page 4

Art Unit: 1734

apply different imprint or pattern on the substrate; for instance – Shimoda teaches (see column 10, lines 1-3) an ink jet apparatus using a plural kinds of ink jet heads having different number of nozzles and JP'574 discloses (see Figs 1-2 and English translated Abstract) an ink-jet head arrangement wherein a plurality of droplet jet heads (head elements 4, 6, 10, 12) with different widths and lengths arranged along the width and longitudinal directions of the substrate. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the first droplet jet head, the second droplet jet head and the third droplet jet head each head having mutually different widths and different lengths and different number of nozzles in Schembri et al to apply the desired array patterns.

## Response to Arguments

- 6. Applicant's arguments with respect to claims 12-13, 24-25 and 33-38 have been considered but are most in view of the new ground(s) of rejection.
- 7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Application/Control Number: 10/615,495 Page 5

Art Unit: 1734

Pewelde F-F

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yewebdar T. Tadesse whose telephone number is (571) 272-1238. The examiner can normally be reached on Monday-Friday 8:00 AM-4: 30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Fiorilla can be reached on (571) 272-1187. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
